

→ OPTION №1: MetaMask

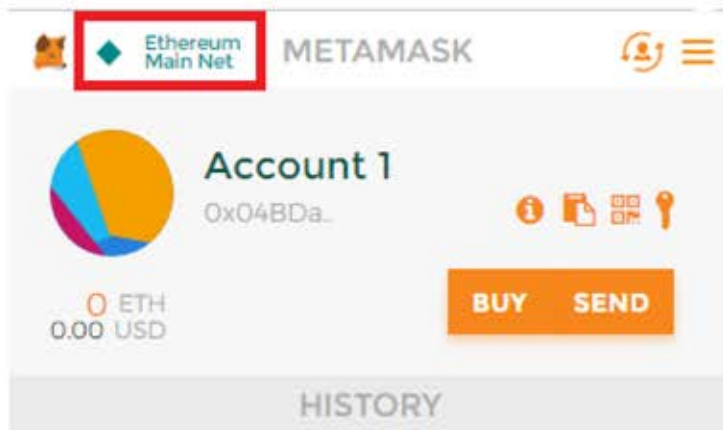

1. Get the MetaMask plugin for Google Chrome: <https://metamask.io/>. If you see the MetaMask fox in the upper right corner of your browser, then the installation has been successful.

<https://metamask.io/#how-it-works>

2. After adding the extension to Chrome, you will be forwarded to this page: <https://metamask.io/#how-it-works>. Make sure you watch the video there as it shows you how to use MetaMask for creating a new wallet (it should be sufficient to watch the video till 0:50).
ATTN: When creating a new wallet, make sure you keep your password and the generated twelve-word phrase in a safe place!

3. Before making any transactions, make sure you are operating in the Ethereum Main Net.

4. Before any Dentacoins are transferred to your wallet, a MetaMask pop-up window will appear – just confirm the transaction there.

→ OPTION №2: MyEtherWallet

1. You can easily set up a wallet at www.myetherwallet.com as well. After entering a strong password (min. 9 characters) and clicking on "Generate Wallet," you will be redirected to a new page.

<https://www.myetherwallet.com>

 **MyEtherWallet** Open-Source & Client-Side Ether Wallet · v3.5.0 English ETH-beta (MyEtherWallet)

[Generate Wallet](#) [Send Ether & Tokens](#) [Swap](#) [Send Offline](#) [Contracts](#) [View Wallet Info](#) [Help](#)

Generate Wallet

Enter a strong password (at least 9 characters)

Generate Wallet

Generate Wallet

2. Please, save the generated Keystore File (UTC / JSON) - it is a backup of your wallet. Then declare that you will never lose it (by clicking on the red button).

 **MyEtherWallet** Open-Source & Client-Side Ether Wallet

[Generate Wallet](#) [Send Ether & Tokens](#) [Swap](#) [Send Offline](#) [Contracts](#) [ENS](#) [View Wallet Info](#) [Help](#)

Save your Wallet File.

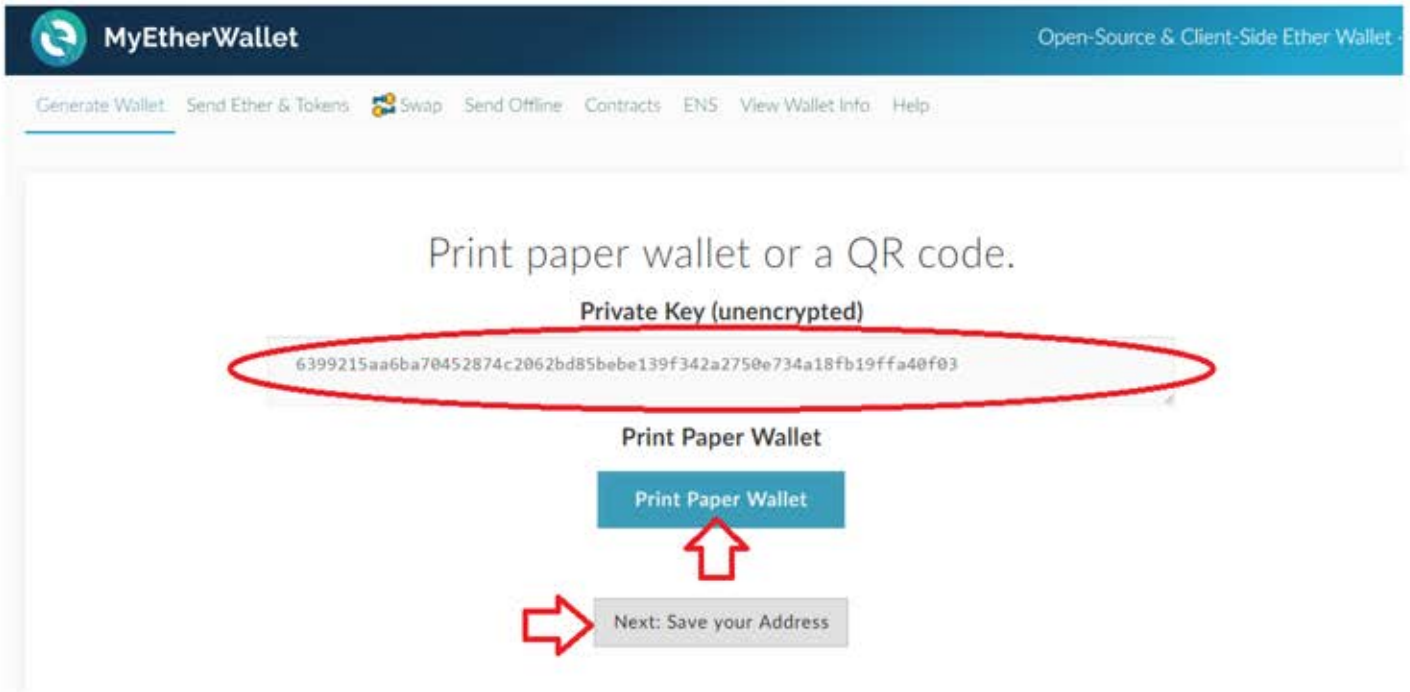

Download Keystore File (UTC / JSON)

Without your Keystore File (UTC / JSON) or Private Key you cannot access your ETH or Tokens.
MyEtherWallet cannot recover anything if you lose it.

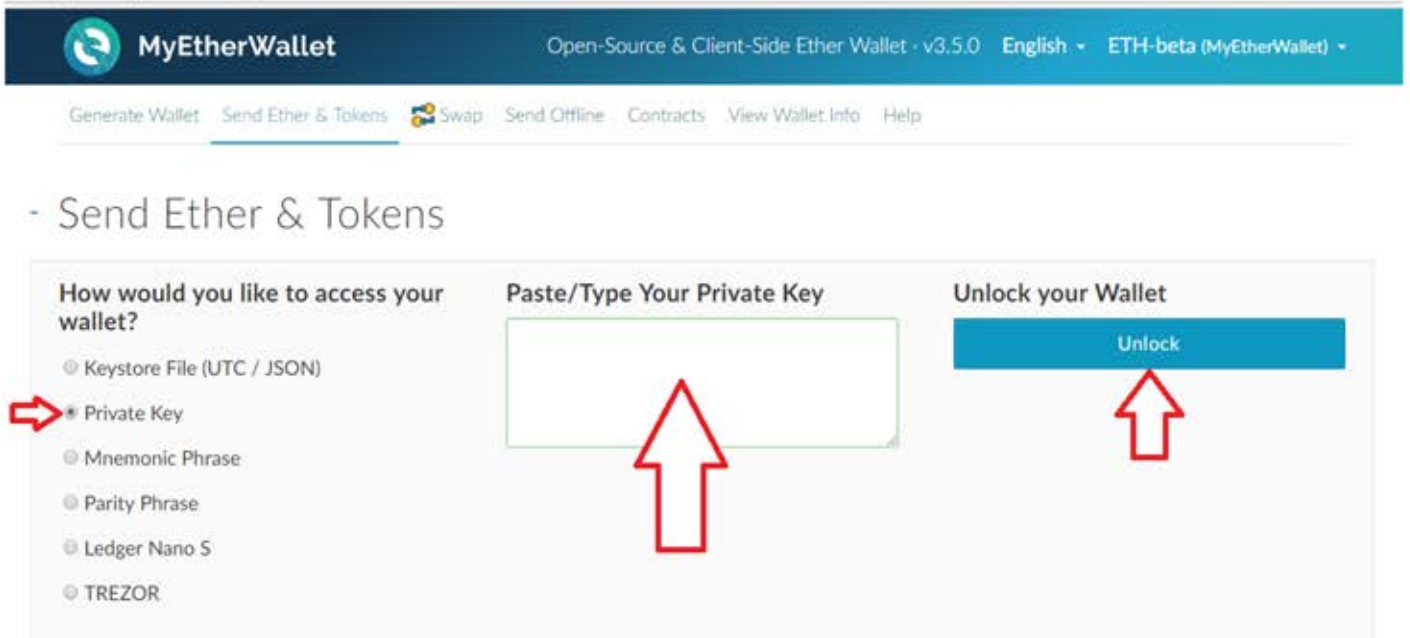

3. Once you save the file, you will be redirected to a page with an automatically generated Private Key. Please, keep it in a safe place, preferably both digitally and printed (Paper Wallet).

IMPORTANT! This is the most important data for accessing your wallet. If you lose it, there is no way it could be restored. EVER. When done, click on "Next: Save your Address".

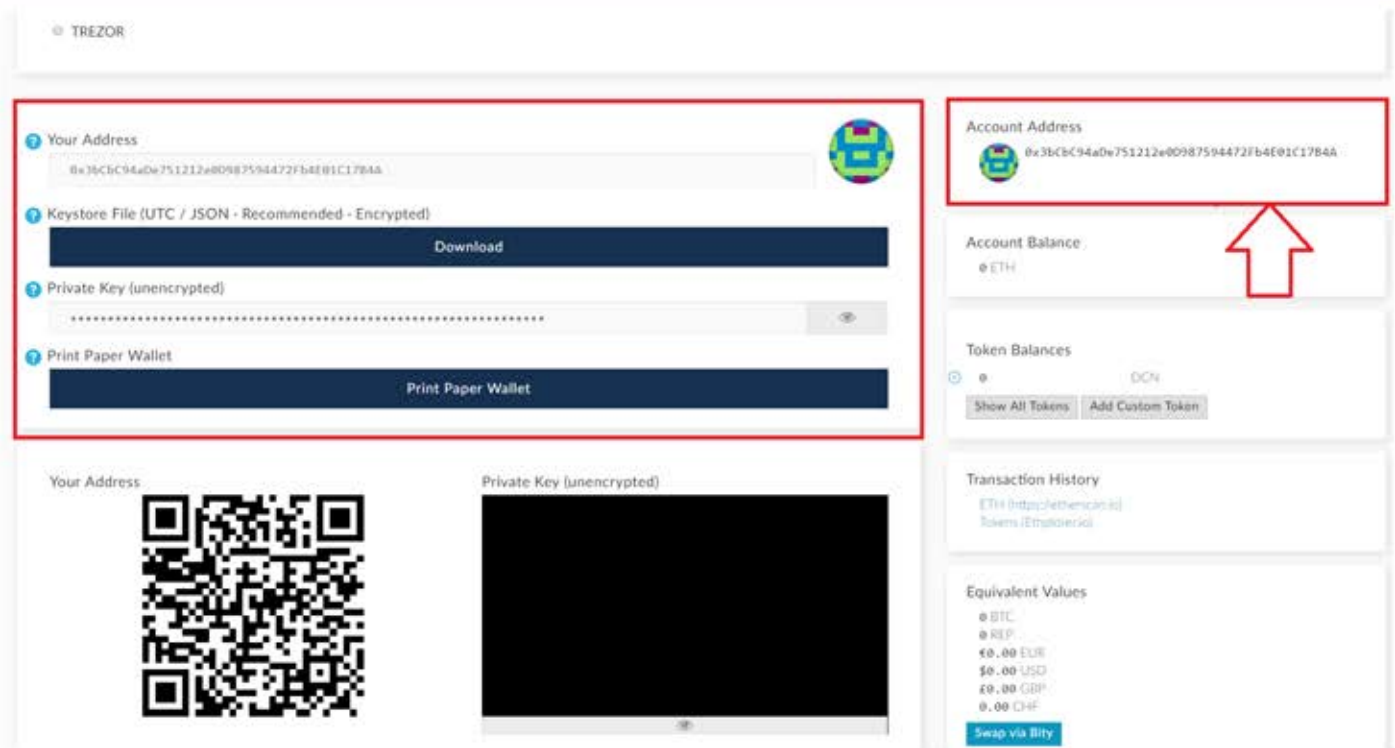

4. Now is the time to open your wallet for the first time. Choose to unlock your wallet with a Private Key, place it in the specified field and click on the "Unlock" button.

<https://www.myetherwallet.com/#send-transaction>

5. Automatically, down on the same page, you will see newly generated fields containing Address (this is something like the IBAN of your bank account, make sure you have kept it in a safe place - again in digital and print version), Private Key, Keystore file, QR code, Paper Wallet. Now you have another chance to keep this important information!

IMPORTANT! Keep in mind that Address, Private Key, Password, Keystore file are extremely confidential! Anyone who owns your address can check the balance of your account at any given moment. And whoever owns your Private Key can do with your funds whatever he wants.

6. A last important step is to add Dentacoin as a Custom Token in your wallet so you can check the amount of Dentacoins you own. This is done as follows:

6.1. Below the Account Balance section on the right side of the page, you will see the Token Balances section. Click the "Add Custom Token" button.

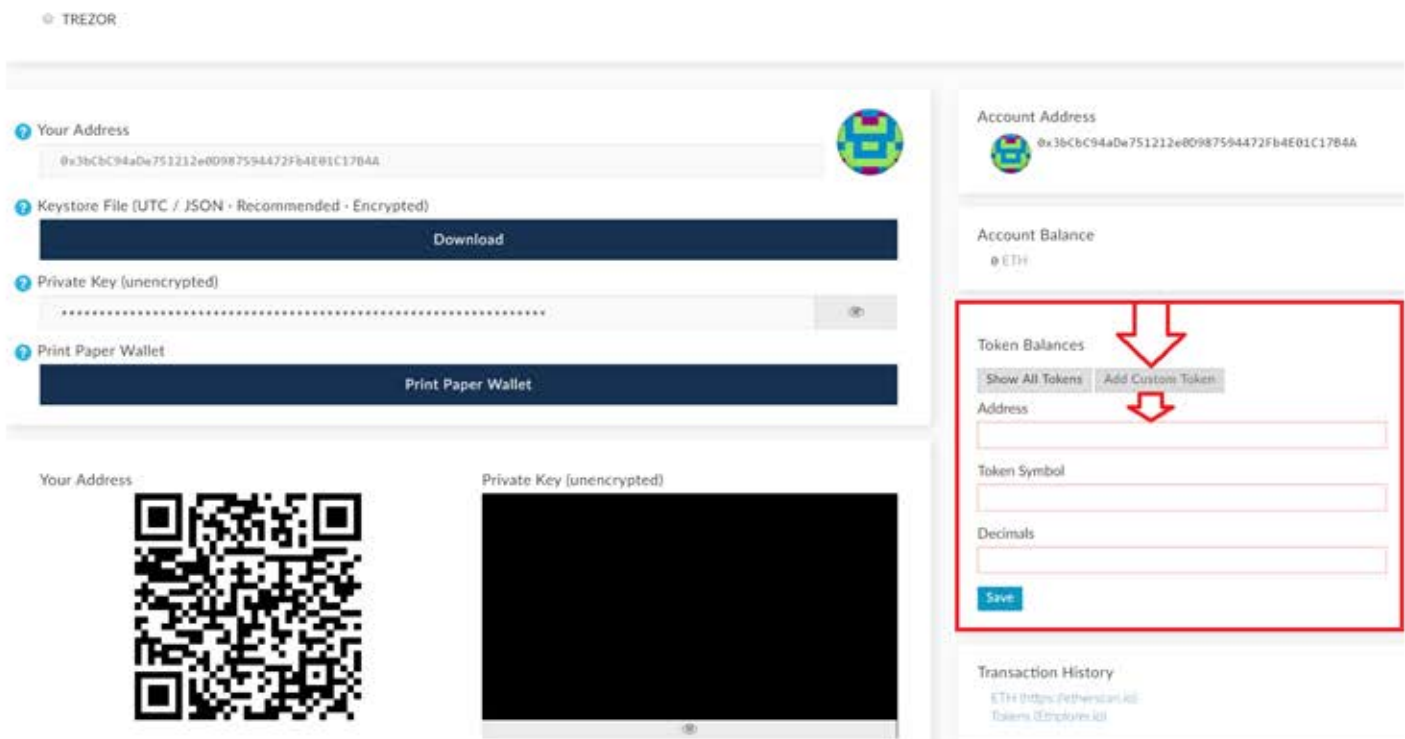

6.2. In the fields Address, Token Symbol, Decimals, enter the following:

Token address: 0x08d32b0da63e2C3bcF8019c9c5d849d7a9d791e6

Token symbol: DCN

Decimals: 0

6.3. Click the Save button. And you're done. You can now see your Dentacoin balance.

7. From here on, every time you want to enter your wallet, the steps are as follows:
 - 7.1. Go to www.myetherwallet.com.
 - 7.2. Click the Send Ether & Tokens section in the top menu.
 - 7.3. Select the option to unlock your wallet using the Private Key, then place the Private Key in the specified field.
 - 7.4. You will see the "Unlock" button again - click on it. You are already in your wallet.

<https://www.myetherwallet.com/#send-transaction>

The screenshot shows the MyEtherWallet interface. The top navigation bar includes the MyEtherWallet logo, version information (v3.5.0), language (English), and network (ETH-beta). The main menu has options like 'Generate Wallet', 'Send Ether & Tokens', 'Swap', 'Send Offline', 'Contracts', 'View Wallet Info', and 'Help'. The 'Send Ether & Tokens' section is active, showing options for how to access the wallet. The 'Private Key' option is selected and highlighted with a red arrow. A large red arrow points to the empty text input field for pasting the private key. Another red arrow points to the 'Unlock' button, which is highlighted in blue.

8. You can also unlock your wallet using the generated Keystore file. The steps are as follows:
 - 8.1. Go to www.myetherwallet.com.
 - 8.2. Click the Send Ether & Tokens section in the top menu.
 - 8.3. Select the option to unlock your wallet using Keystore File (UTC / JSON), then upload this file and enter the password generated by the time of the wallet creation (the one with at least 9 characters).
 - 8.4. You will see the "Unlock" button again - click on it. You are already in your wallet.

The screenshot shows the MyEtherWallet interface. The top navigation bar includes the MyEtherWallet logo, version information (v3.8.8), language (English), and network (ETH). The main menu has options like 'Generate Wallet', 'Send Ether & Tokens', 'Swap', 'Send Offline', 'Contracts', 'ENS', 'View Wallet Info', and 'Help'. The 'Send Ether & Tokens' section is active, showing options for how to access the wallet. The 'Keystore File (UTC / JSON)' option is selected and highlighted with a red arrow. A red arrow points to the 'SELECT WALLET FILE...' button, which is circled in red. Another red arrow points to the 'Unlock' button, which is highlighted in blue. Below the file selection button, there is a text input field for the password, with a red arrow pointing to it.
